# AGRONOMÍA COSTARRICENSE

## Awards

## Scientific papers

- Litterfall and decomposition rates of *Vochysia guatemalensis* leaves in a 10 year plantation, Tabarcia de Mora, Costa Rica.  
*José Fco. Di Stefano and Luis A. Fournier (QPD)* ..... 9-16
- Multielemental analysis of foliar tissue using ICP-MS.  
*Ana Lorena Alvarado, José Miguel Yglesias and Oscar Güell* ..... 17-27
- Organic and chemical nitrogen in black sorghum grown with forage peanut as a cover crop. I. Nutricional value and dry matter production.  
*Rodolfo WingChing, Augusto Rojas and Anaité Quan* ..... 29-39
- Genetic diversity of *Phytophthora infestans* isolates collected in potato fields of Costa Rica using RAPDs.  
*Oswaldo Pérez, Roberto Valverde, Luis Gómez and Arturo Brenes* ..... 41-55
- Isolation and identification of fungi associatted to sclerotia of *Sclerotium cepivorum*, causal agent of white rot in onion, in the high lands of Cartago, Costa Rica.  
*María del Milagro Granados and Amy Wang* ..... 57-66
- Soil-tree relationship and site factors in young teak (*Tectona grandis*) plantations in the Western zone of the Panama Canal.  
*Manuel Mollinedo, Luis Ugalde, Alfredo Alvarado, Jean Mark Verjans and Luis Carles Rudy* ..... 67-75
- Nutrient uptake and partitioning of sweet pepper plants (*Capsicum annuum* cv. UCR 589) in Alajuela, Costa Rica.  
*Alvaro Azofeifa and Marco A. Moreira* ..... 77-84
- Variation of bulk density in soil orders of Costa Rica.  
*Alfredo Alvarado and Warren Forsythe* ..... 85-94

## Technical note

- Survival of duraznillo (*Prunus annularis*) in a forestry plantation and agroforestry systems.  
*Javier Monge and Renán Agüero* ..... 95-100

## Analysis and comment

- Agrarian policies and rural development in Costa Rica: definition elements in the new international context.  
*Jorge Mora Alfaro* ..... 101-133

Editorial de la  
Universidad de Costa Rica  
*Sesquicentenario de la Campaña  
Nacional contra los filibusteros*
