COSTARRICENSE

Agronomic and nutritional evaluation of African star grass-based pastures
(Alfredo Alvarado, Rafael Mata and Miguel Chinchilla)

Clay minerals identified in soils of Costa Rica from 1931 to 2014: I. History, methods of analyses, and mayor clay types found
(Fabián Echeverría, Miguel Barquero and David Rodríguez)

Root development in F1 coffee hybrids obtained by tissue culture.
(Alfredo Alvarado, Rafael Mata and Miguel Chinchilla)

Body condition assessment in a grazing Jersey cows herd in the highlands of Cartago. Variations during the productive cycle.
(Carlos Henríquez, Lidieth Uribe, Arturo Valenciano and Rogelio Nogales)

Supplementation with organic selenium and its effect on productive and reproductive performance in grazing dairy cows
(Jeffry Sánchez-Salas, Jorge Alberto Elizondo Salazar, Evelio Víquez Matei and Carlos Orozco-Vidaorreta)

Melles associated with the avocado crop (Musa sp. Cv. Cavendish).
(Fabian Galvis and Laura Yolima Moreno)

Characterization of visual symptoms of nutritional deficiencies in oak seedlings.
(Frank E. Montenegro-Juárez, Consuelo Rojas-Idrogo, David Quevedo-Calle and Guillermo E. Calderón, Marianyela Ramírez, Fernando Ramírez and Ethel Villalobos)

Effect of sulpomag and organic complexs as partial substitutes of the culture medium used in the micropropagation
of apparently healthy banana plants. II. Nutritional Value.
(Luis Villalobos and Jose Arce)

An analysis of the potato’s crop nutrient status in Costa Rica based on existing information.
(Rafael Armijo and Omar Somarriba Jones)

Molecular characterization using rep-PCR of native isolates of Bacillus thuringiensis, obtained from soil samples.
(Fabian Galvis and Laura Yolima Moreno)
