Presentation

- Carlos Henríquez Henríquez 7-8

Scientific papers

Effect of storage at different temperatures on development of external color and quality of pineapple fruits cv. Gold Extra Sweet.

- Luis Ulloa, Marco Vinicio Sáenz and Johanny Castro 9-20

Soil inoculation with *Pseudomonas fluorescens*, *Azospirillum oryzae*, *Bacillus subtilis* and mountain microorganisms (MM) and its effect on a soybean-tomato crop rotation system under greenhouse conditions.

- Leida Castro Barquero, Mariana Murillo Roos, Lidieth Uribe Lorío and Rafael Mata Chinchilla 21-36

Tuber quality and yield components of potato (*Solanum tuberosum*) F₁ hybrids.

- Carolina Porras-Martínez and Arturo Brenes-Angulo 37-46

Use of the entomopathogenic nematode *Heterorhabditis atacamensis* CIA-NE07 in the control of banana weevil *Cosmopolites sordidus* in vitro.

- Marianela Amador, Diego Molina, Cesar Guillen, Elena Parajeles, Katherine Jiménez and Lidieth Uribe 47-60

Populations and identification of fungi causing postharvest molds, on pineapple peduncles in two regions in Costa Rica.

- Johanny Castro Chinchilla and Gerardina Umaña Rojas 61-77

Effect of land-use on the P forms of an Andisol.

- Carlos Henríquez 79-85

Effect of four growth-promoting rhizobacteria on crown blight caused by *Phytophthora capsici* in sweet pepper (*Capsicum annuum*).

- Carlos Ramírez, Zorith Soto, Leida Castro, Luis F. Arauz, Lorena Uribe-Lorío and Lidieth Uribe 87-100

Grassland soil tillage by three implements in an Ultisol and its physical and hydromedical implications.

- Manuel E. Camacho, Rafael Mata and Warren Forsythe 101-115

Concentration and accumulation of nutrients in the aerial biomass of teak plantations 3 to 18 old, in the Panama Canal watershed.

- Rafael Murillo, Alfredo Alvarado and Jean Mark Verjans 117-136

Technical notes

Spatial distribution of moisture and its relation with soil texture.

- Kenneth Largaespada and Carlos Henríquez 137-147

Comment

- 2015: International Year of Soils 149-155
